

Picking a health plan just got easier.

Decision Doc™ will help you choose the health plan that best matches your specific health needs.

Here's how it works:

1. Answer a series of questions about your specific needs. You will be asked about the frequency of office visits and types of medication for you and your family.
2. Receive an interactive report showing which health plan will save you the most money. Go-back and test additional medical use cases, as necessary.
3. Save or print your report. Then, use your report to make an informed decision when selecting a plan. If you have questions, a live MyHealthMath analyst is just a phone call away.
